	The instructor cared about my learning.	4.8	5	5	.56	-	-	1	2	13	16	16
	The instructor evaluated my work in a fair manner.	4.8	5	5	.56	-	-	1	2	13	16	16
	The instructor showed a thorough knowledge and understanding of the subject matter.	4.8	5	5	.53	-	-	1	1	14	16	16
	The teaching methods and techniques used by the instructor were effective.	4.7	5	5	.58	-	-	1	3	12	16	16

<b>Faculty:</b>	Joseph Christensen
<b>Question:</b>	What do you consider the instructor's strongest attributes in relation to this course?
<b>Response Rate:</b>	75.00% (12 of 16)
1	Very interactive, makes physics interesting to students by demonstrating its value and applications in a world setting, can solve (literally) any problem, always willing to help students understand the material, fair in grading, well-organized, is VERY understanding of college students' schedules, helps students to be versed in the language of a physicist
2	If you need help he is willing to give you the help you need. This is not a class where you learn the material and forget about it right after the test. He teaches the information in a way that sticks with you and helps you when solving other problems. Importantly, he engages everyone in the class discussion so no one is left behind. Dr. C is good at what he does!
3	Probably the best instructors I have ever had. Clearly knows how to get abstract ideas/concepts into students' head in a way they can understand. Able to make physics not mundane.
4	I have been consistently impressed by Dr. Christensen's abilities to teach difficult Physics concepts in a clear way. His thorough knowledge of the subject matter and beyond is a definite advantage in being able to explain the many aspects of each concept. I am so grateful to have had him as a teacher and have learned a great amount thanks to his guidance.
5	Explaining the problems and knowing the material.
6	Knowing the content in depth and being able to communicate that knowledge to us. He used real world examples which were useful and made the course relevant. I greatly appreciated his sense of humor and personality which made him approachable rather than intimidating like some of the coursework.
7	knew what he was talking about and how to teach the information
8	Good at explaining and helping improve understanding
9	Great at explaining material, very easy to ask questions to.
10	You've been probably the best teacher I've ever had. Thanks for actually taking care of your students and helping work around some of our other classes.
11	His strongest attributes were his in-depth knowledge of the material, as well as his ability to relay his knowledge onto his students in an effective way. I really liked that he was not only concerned about us knowing the math, but that he was also concerned with us being able to explain how we arrived at our answer in "English." Overall, his teaching methods were very efficient and I loved that he would bring props to class to help us better understand the topic we were on.
12	Dr. Christensen is one of my favorite professors at TMC, and his teaching style is second to none. He is the best in my opinion at really making sure students get involved in class and learn/understand the material.

<b>Faculty:</b>	Joseph Christensen
<b>Question:</b>	What do you consider the instructor's areas for improvement in relation to this course?
<b>Response Rate:</b>	62.50% (10 of 16)
1	There is no way to improve, keep this course the same
2	Last semester I had wished the tests would reflect the homework more and this semester I noticed that the test questions strongly resembled what we had practiced. No room for improvements in other areas.
3	Good luck working with Prof. Neal...
4	I enjoyed knowing the practical use of what we were learning so add more of that if possible.
5	Keep doing what you're doing *Thumbs up* (and fire Neal)
6	n/a
7	Would have been nice to get through a little more of the book.

8	<p>Nothing, keep doing what you're doing. Also, just wanted to say professor Neal showed a vast improvement this semester. Although he definitely needs a tutorial of capstone and setting up circuits.</p> <p>Last thing, just wanted to say I hope everything is going good in your life, it seemed like you had some stressful stuff going on there at the end of the semester. Hope everything is okay.</p>
9	No need for improvement.
10	Not grade the homework as strictly, or make it worth a high percentage of the grade. Making exams a higher percentage might be more effective.
